**TECHNICAL ADVISORY COMMITTEE (TAC)
FOR THE
CONGESTION MANAGEMENT PROGRAM (CMP)**

**July 19, 2007
MINUTES**

The one hundred sixty-seventh (167th) meeting of the Technical Advisory Committee (TAC) was held in the SamTrans Offices, 1250 San Carlos Avenue, San Carlos, Bacciocco Auditorium. Co-chair Porter called the meeting to order at 1:15 p.m. on Thursday, July 19, 2007.

TAC members attending the meeting are listed on the Roster and Attendance on the preceding page. Others attending the meeting were: John Hoang – C/CAG; Richard Napier – C/CAG; Ron Popp – City of Millbrae; Brian Lee – San Mateo County Public Works; Jim Bigelow – CMEQ; Pat Dixon - SMCTA CAC

1. Public comment on items not on the agenda.

None.

2. Issues from the last C/CAG and CMEQ meetings.

As shown on the Agenda.

3. Approval of the Minutes from January 18, 2007.

Approved with correction to reference member McAvoy as co-chair under Item No. 4 – Measure A Update.

4. AB1546 Countywide Congestion Management Program for ITS Projects

John Hoang presented on the updated program criteria and project selection process for the AB1546 countywide intelligent transportation system (ITS) projects. This item was brought back the TAC with changes per comments from the May 2007 TAC and CMEQ meetings. Recommendations included allowing signal controller Model 170 upgrades to be eligible for funding, establishing scoring ranges for intersection volumes, implementing a two-step project selection process, and enabling the maximum award amount to be scalable based on the number of applications received.

There were no comments and the item was approved for recommendation.

5. Review and recommend approval of the Draft 2007 Congestion Management Program (CMP) and Monitoring Report

John Hoang presented on the 2007 CMP Report highlighting components of the report that have been updated since the last report in 2005. The updates included changes to the LOS (Level of Service) for roadway segments and intersections, and the updated trip reduction and travel demand elements. In addition, the report also includes an updated monitoring results that show network deficiencies, travel times, and transit riderships. It

was noted that there are information and data that are still missing in the draft but will be incorporated in the final document. Staff is working with MTC and awaiting guidelines to be established for the development of the proposed 2008 STIP project list.

Comments from the TAC are as follows:

Member McAvoy questioned why only two segments failed within the last couple of years and why facilities have not shown much degradation in the monitoring results. Member Patterson pointed out that the deficiencies are based on established LOS. Other segments showed increases and decreases but are still within the established LOS. Richard Napier, Executive Director of C/CAG added that established LOS were lower in more problematic areas.

Member Patterson pointed out that the Transportation Authority need to consider improvements on deficient CMP routes when prioritizing projects for the Measure A program funds. Member Sharma stated that higher priority should be given to projects identified to be deficient on the CMP network. Patterson added that projects would need to qualify based on eligibility within the expenditure plan and would require a different ranking if identified to be on a deficient route.

Member Sharma questioned whether the TAC can take action and recommend the draft for approval with missing tables and data, for example, page 7-14 (Annual cost to implement countywide deficiency plan spreadsheet) and page 8-4 (Proposed STIP project listing). Member Wong indicated that the draft recommendations for the STIP would be brought to the TAC for recommendations separately and before incorporating in the CMP. Staff restated that the Final 2007 CMP would be brought to the TAC for final recommendations.

Member McAvoy mentioned that staff should check with MTC regarding the 2006 STIP spillover issues. Member Wong pointed out that results of the monitoring report indicated that travel time on US 101 had decreased specifically due to the implementation of ramp metering and that other reports have shown similar positive results also.

The TAC approved recommending the Draft 2007 CMP document with the understanding that the final version be brought back for final recommendations for approval.

6. Member Reports

Co-chair McAvoy reported that the TA strategic plan have received letters of issues back from cities. The TA will be announcing GEC awards to start work on contracts estimated to be between \$15-20M per year to move A&E work forward. In addition, SamTrans is in process of developing a strategic plan that will focus on the financial side regarding the District along with Caltrains, TA, and SamTrans. SamTrans will come back to the TAC to provide an update. This process will move the District to the role of mobility management as opposed to bus/rail service providers and will result in more communication and outreach to cities. Member Sharma stated that with respect to highway improvement projects, we need money from State and consider ways of getting the CTC on board. McAvoy suggested trying to access federal and state funds through congressional members.

Richard Napier, Executive Director of C/CAG, added that there are timing issues in relations to the primary focus of using the State funds to leverage Measure A and that it may be necessary to move funds around in addition to leveraging funds beyond the STIP.

Napier also reported that C/CAG was unanimously reauthorized. C/CAG will be sending out agreements with all the jurisdictions' signature. It was also noted that C/CAG has had a lot of success working with the TA. The SB 613, a 10-year extension to the AB 1546 with approximately \$30M in potential revenue (\$15M of which directly goes back to the local jurisdictions), is ready for the Senate floor and will need support letters when it's in the Governor's office. C/CAG will need help from jurisdictions and will provide sample support letters.

Meeting adjourned.
